

Filming, streaming and photography

Appendix to the prospectus and the Head of the River Safety Statement · Saturday 24th of October 2026

Approved 19 October 2026. Everything here follows a policy the club has adopted.

Castleconnell Boat Club may stream the Head of the River live, and may publish clips and photographs afterwards. This notice says what that means for the people in the footage: who decides, who to tell if a competitor should not be filmed, how long anything stays up, and how to have it taken down. It is written to be read with the event's Safety Statement, and it follows **Rowing Ireland's Photographic and Filming Policy (RI-SFGP14)**, which this club has adopted in full.

1 · What we do

- The racing is streamed live on **YouTube**, on the club's own channel, from the bank and the finish.
- Clips and still photographs are published afterwards on the club's social media accounts.
- Coverage follows the racing, not individuals: it frames crews and boats, as RI-SFGP14 requires.
- Nothing is filmed in the changing rooms, the toilets or any other private area, at any time, by anyone. The club's Child Safeguarding Risk Assessment names photography in prohibited areas as a risk of harm to children, and this is the control for it.

2 · Who is responsible

CONTROLLER	Castleconnell Boat Club CLG, Lacka, Castleconnell, Co. Limerick, V94 662A
HEAD SECRETARY	Rory Corbett · 085 226 4155 · racing@castleconnellbc.ie — the do-not-film list, accreditation, and take-down requests
CHILD PROTECTION	The club's Child Protection Officer, through castleconnellbc.ie/safeguarding — any concern about an image of a child

3 · Consent, and who holds it

RI-SFGP14 requires consent to **both the taking and the publication** of images, and for a competitor under 18 that consent is a parent's or guardian's. The club that enters a crew holds those consents for its own members — it is the club that knows its members and already holds their media permissions. **Entering a crew is not itself consent to be filmed**, and this club does not treat it as such.

4 · Not being filmed

Any competitor can be kept out of the coverage. Tell the Head Secretary before racing — a name and a crew is enough, and no reason is needed. That competitor is kept off the stream and out of anything published afterwards.

A crew cannot be raced invisibly on a public river, and this notice does not pretend otherwise: what the club controls is its own camera and its own channel, and that is what this undertaking covers.

5 · How long it stays up

- **The recording of the stream stays available for twelve months**, to the following Head, and is then deleted or made unlisted.
- Clips and photographs on the club's social media are kept under the club's own Photography and Use of Images policy, the same as any other club photograph.
- Results, times and finishing orders are the club's competition record. They are not images, they are published permanently, and this notice does not cover them.

6 · Taking something down

Anyone in the footage, or a parent or guardian of a competitor under 18, can ask for a clip, photograph or recording to be removed. Ask the Head Secretary or the Child Protection Officer. No reason has to be given, and the club will act within seven days. A request about a child is acted on immediately and the reason asked for afterwards, if at all.

7 · Filming by anybody else

- Photographers and video operators recording the event must be **accredited in advance** — seven working days before the event, with professional identification, to the Head Secretary, who may decline anyone who will not meet these conditions. This is RI-SFGP14 item 11.
- Everyone photographing or filming signs in on the day, and anyone doing so officially carries identification.
- Parents and guardians filming their own children is expected and welcome. Please respect other people's young people: frame your own crew, and do not publish somebody else's child.
- No one-to-one photography of a competitor under 18, at any time, anywhere on the site.

8 · The stream itself

- **Live chat is turned off** for the whole broadcast. A public chat running under a junior race is an unmoderated space carrying the club's name, and the club will not run one.
- Comments on the recording afterwards follow YouTube's own rules for content featuring minors, which restrict them.
- YouTube and the social media platforms host this content on their own terms, and a public stream can be seen and recorded by anyone. Nothing in this notice can change that, which is why section 4 exists.

9 · Rights, and where to complain

Anyone in the footage can ask what the club holds about them, ask for it to be corrected or erased, and object to it being published. Write to the Head Secretary at the address above. A concern about how an image of a child was taken or used goes to the club's Child Protection Officer, and can also go to Rowing Ireland, to Tusla, or to An Garda Síochána — Rowing Ireland's own policy says so, and this club does not stand between a person and any of them. Complaints about data protection can be made to the Data Protection Commission, dataprotection.ie.
